Abstract

There is a remarkable gap between the institutional service for the severely mentally and physically handicapped and the community-based service for those persons. It also varies among the different prefectures all over Japan. The importance and speciality of family support activity for four persons who live at own homes is presented.

要約

重症心身障害児の地域医療福祉システムの構築の歴史と課題、とくに、都道府県および施設間の格差に分析を加えた。あわせて岡山県での地域ケアの実践成果を家族支援の立場から検討し、望ましい条件整備について提言を行なった。
