

Editor's Postscript

The Editorial Committee of the Kawasaki Medical Welfare Society would like to thank all those who contributed to the publication of the current issues of both the Japanese and English language numbers of the Society's journals. We also would like to extend our thanks to all the scholars who submitted their research to our journals.

A special thank you goes out to all of the scholars who submitted their work to the English language journal, *Kawasaki Journal of Medical Welfare*. For most of our contributors English is a second language, so it takes a special effort to write a paper in a foreign language and we, the members of the Editorial Committee, wish to say thank you to all the scholars and researchers who took up the challenge to write their work in English for publication in the *Kawasaki Journal of Medical Welfare*.

The Editorial Committee would also like to thank all of the reviewers. Without them we could not assure the quality of the papers being published in our journals. The work is hard, often comes during busy times of the year and entails a lot of time. Thank you for your cooperation.

Thanks also to all of the departments that make up the Kawasaki University of Medical Welfare. They are the ones who recommend to their respective teaching staffs the opportunity of publishing in our journals. We thank them for their cooperation and look forward to more work being submitted in the future; especially in the English language edition!

Finally, a big thank you to our Editorial Committee. Without their hard work and cooperation both journals would be impossible to publish. The committee members all look forward to reading and reviewing the exciting new research that is sure to be appearing in future editions of both our Japanese and English language journals.
